Elap Freedom - Electronic Gas & Brake

The Elap Freedom has been developed to allow full acceleration and braking control by simply operating a light level.

The acceleration system uses our existing computer interface for fly by wire vehicles, and the new braking system uses fault tolerant hydraulic methods.

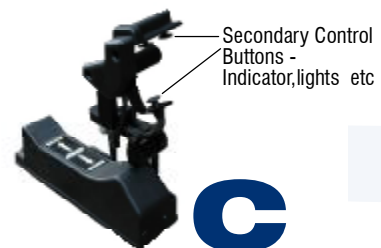

The handset is available in 3 options, however specific customisation can be undertaken to suit your needs.

A

B

C

Normal operation is push forward to accelerate and pull back to brake, the amount of effort required to achieve these results can be adjusted to suit your abilities and driving style.

The unit can be mounted in various locations within the vehicle normally a frame from the floor is built to ensure perfect location for you.
