

V115 Boot Hoist

The Elap V115 wheelchair/scooter hoist is specially designed for electric (platform) wheelchair/scooter users. With the aid of Elap V115 the wheelchair/scooter can be lifted into a car in a simple manner. This increases the user's mobility.

The Elap V115 has a hoisting capacity of 115 kg and can be supplied with various hoisting accessories. If there is enough space in the car the complete (platform) wheelchair can usually be lifted and placed into the car.

The V115 folds down by means of a simple manual operation. As a result, the hoist takes up little space. As an extra the hoist can be fitted with an electric rotating unit, so that turning the wheelchair into the car

can take place without any effort.

Hoist folds down to save space

Optional swivel unit
