

V200 Boot Hoist

The Elap V200 wheelchair/scooter hoist is the most powerful hoist that is currently available on the European market. This beautifully styled hoist was designed to easily lift up the heaviest category of wheelchairs/scooters into a car with the aid of the supplied hoisting bracket.

Its maximum hoisting capacity of 200 kg makes it possible to even lift up the heaviest wheelchairs/scooters, including accessories. This is subject to the hoist being mounted in a car with sufficient space for the wheelchair/scooter.

At the centre of gravity a hoisting point has been fitted to the wheelchair/scooter. As a result the wheelchair/scooter remains stable during lifting and turning.

The Elap V200 hoist can be turned into or outside of a car in a comfortable manner, either manually or by means of an electric rotating unit.

Optional swivel unit
