*Unique hand-held system ● Highest quality components ● Accelerator automatically 'cut' when brake applied ● Can be used in conjunction with Ring Accelerator ● Can be fitted to most vehicles ● Fully Electronic (interface) or electro-mechanical system*

## 906 satellite (electronic) Accelerator

The Satellite accelerator has many unique features which make it a pleasure to use. It is suitable to be fitted to most vehicles and is offered in either fully electronic or electro-mechanical versions. Since the unit is hand-held all functions such as airbag and secondary controls mounted on the steering wheel are retained for use. The vehicle can be driven conventionally when required, regardless of whether the electronic or electro-mechanical system is fitted.
